Updated Incident, Injury, Trauma and Illness policy.

I have outlined the key changes to this policy:

'Any child with a high fever or temperature reaching 38°C or higher will not be permitted to attend the Service until 24 hours after the temperature/fever has subsided without pain relief. You may be asked for a medical clearance to return to care.'

'To protect children within our service, all children who receive vaccinations (immunisations and flu-shots inclusive) are able to return to care the following day after they receive the injection.'

Please feel free to let me know if you have any questions regarding this.

Please acknowledge once read and understood.
