### Ed leader Update

Hey everyone,

Just a few updates in regards to programs and events:

\*Fortnightly reflection - just an update with our fortnightly reflections, we are now doing monthly reflections moving forward. With your current fortnightly reflections that you are working on please extend the date to 30/09/23 and then your next reflection will be monthly. If you haven't already, please encourage all educators to contribute to the fortnightly reflections including your trainees, floats and even casuals. When you have a spare second during rest time or throughout the day ask your room leaders or permanent staff in the room about the fortnightly reflection and if you can contribute.

#### \*Events Calender

-I've attached the events for October, we have mental health week coming up and would like to possibly collaborate with the other Ellenbrook services. If you have any ideas on how we could do this or what we could do for mental health week please comment. I've attached a rough ideas of what we could do but any cool ideas please just me know and we can add/change.  
-We are starting to plan our 2024 calender of events, If you have anything you would like to add or take away please comment. How are you finding the planning of the events what's working or what's not working?

#### Room Leader Catchup

\*We will be doing a room leaders catch-up in October just to have a catch-up on how the rooms are going, share ideas of what's working well in your rooms, any challenges that you frequently come across, and just a general catch-up. This will be at our October staff meeting

\*What would you like to see more from me? Is there anything you would like help with, any training you are interested in or anything at all please let me know.

Observations - How is each room going with observations? Have you nearly completed them? Next term's observations will be the milestone checklists or the summative section.

Thank you!  
Becky

You are doing amazing! So helpful with my 100 million questions and my StoryPark screw ups

Observations are tracking well, all complete other than evaluations for planned activities!

Mental health week looks fab! With regards to the calendar events, I think it's going well... I liked the epilepsy and cancer suggestions made on our chat. Mindful not to overload ourselves. If there are other fun days we want to plan activities for at a room by room level we could always have our own extensive calendar with all the fun food days and other creative days to coincide with any children's interests, intentional or spontaneous learning experiences we plan...
